

Yitages Adane

Full-Stack Software Engineer

yitagesadane88@gmail.com | [GitHub](#) | [LinkedIn](#) | +251996263053

Profile

Passionate Full-Stack Developer and 4th-year Software Engineering student specializing in React, Next.js, and Node.js. Skilled in building performant, scalable web applications with a focus on modern user interfaces and robust backend integration. Committed to clean code, accessibility, and delivering business impact through efficient software solutions.

Skills

Frontend:

React, Next.js, TypeScript, Tailwind CSS, React Query, React Router, MUI, Chakra UI, Framer Motion, Chart.js, Vite

Backend & APIs:

Node.js, Express, JVM, REST APIs, Web3.js

Database & Cloud:

MongoDB, MySQL, SQL Server, Prisma, Firebase, AWS, Azure

Tools & Mobile:

React Native, Expo, Docker, Kubernetes, Git/GitHub, Postman

Projects

Yitu GPT | [Live](#) | [GitHub](#)

React, Express, MongoDB, OpenAI, Stripe

- Developed a full-stack AI chat application integrating OpenAI API for intelligent responses.
- Implemented secure JWT authentication and Stripe payment processing.
- Utilized ImageKit for optimized media handling and TailwindCSS for a responsive UI.

Netflix Clone | [Live](#) | [GitHub](#)

React, Tailwind, TMDB API

- Built an immersive video streaming interface with dynamic categories and detail modals.
- Optimized performance with lazy loading routes and efficient asset management for fast interaction.
- Employed clean state management patterns for predictable UI updates.

Amazon Clone | [Live](#) | [GitHub](#)

React, Redux, Stripe

- Engineered comprehensive e-commerce flows including product listing, shopping cart, and checkout.
- Designed composable UI components (cards, badges) and a responsive grid system.
- Ensured accessible keyboard interactions and a seamless user experience.

Hotel Booking | [GitHub](#)

React, Node.js, MongoDB

- Created a booking platform featuring room search, availability checks, and reservation management.
 - Implemented secure authentication, protected routes, and admin dashboard views.
 - Designed server-driven data tables to handle pagination and large datasets efficiently.
-

Experience

Software Engineering Student | Arbaminch University

Year 4 — Present

- Focusing on full-stack development using modern JavaScript tooling.
 - Active member of the Arbaminch University Tech Hub, collaborating on peer learning and projects.
-

Education

BSc, Software Engineering (Year 4)

Arbaminch University

- Member, Tech Hub
